

Brooms

BST / BST RT

The BST and BST RT Brooms are the ideal tools for levelling out rubble, gravel, top soil, ballast, etc. They are also suited to sweep water or snow.

- **Compact and robust design:** long service life.
- **Different widths available:** 1200 mm / 47.24 in - 2400 mm / 94.49 in for BST; 1500 mm / 59.06 in - 2000 mm / 78.74 in for BST RT.
- **Additional rubber blade:** standard for BST RT; for BST as optional accessory available.
- **Easy to fit:** can be mounted to different carrier machines.
- **BST RT:** also sweeps corners perfectly. **Suited for Tiltrotators.**
- **BST:** can be mounted to excavators, tractors and loaders. Coupling for pallet fork available.

BST (rubber blade optional)

BST RT

Brooms BST / BST RT

Type	Weight (kg/lbs)	Width (mm/in)
BST 12	130 / 286	1200 / 47.24

Package consists of: brush, bristle set, fork coupling

Optional for BST RT: with central rubber blade

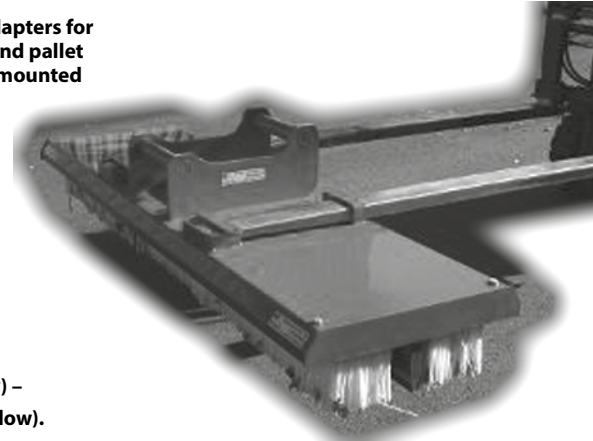

Requirements of Excavator

Different couplings available

Pictures

BST with adapters for excavator and pallet fork. Here: mounted to forks.

The BST RT – either mounted to a NOX Tiltrotator (above) or a fork truck (below) – cleans angles thoroughly and is levelling soft surfaces while cleaning them (below).
