

A GREAT COMBINATION

The Ammann ARX 16-2C is a combination roller that utilises a steel drum in front and pneumatic tyres in the rear for higher machine traction and improved sealing of surfaces. The combi version performs well on both soil and asphalt. Like other light tandem rollers, the ARX 16-2C works flush against curbs and other objects and eliminates the need for special edge compaction efforts. The roller is powered by a Kubota engine. A new vibratory circuit setting delivers expanded frequencies that facilitate quicker compaction. Intelligent drive modes (soft/hard) protect operators and prevent them from damaging sensitive surfaces.

APPLICATIONS

- Small and medium construction sites
- City roads
- Boardwalks
- · Repair works in city centre
